## PROJECTS

---

### YouTube backend

[GitHub](#)

- Developed a video streaming platform featuring video uploads, channel creation, user subscriptions, social media integration (tweeting), playlist creation, and viewing history tracking.
- Implemented secure user authentication and authorization mechanisms using **Bcrypt** and **JWT**, enhancing application security.
- Optimized **MongoDB** database queries using **Aggregation Pipelines**, resulting in a improvement in query performance

### OP Resume Builder

[GitHub](#) | [Live](#)

- Developed a web application that allows users to create one-page resumes by filling out a simple form.
- Integrated multiple resume templates for users to select based on their preferences.
- Designed a **responsive UI** to ensure compatibility with devices of varying screen sizes.

### Job Portal Website

[Github](#)

- Built a full-stack job portal for recruiters to post jobs and hire students.
- Developed a **responsive** and modern UI using **React.js** and **Tailwind CSS**.
- Implemented Redux for efficient **global state management**.
- Created **RESTful APIs** with Express.js and **integrated MongoDB** for data storage.
- Secured **user authentication** with **Bcrypt** and role-based access for recruiters and students.
